**Textroflash™ Primer**

Textroflash™ Primer-36 is a clear acrylic resin, modified-adhesive emulsion for cold-applied applications. It is designed to promote maximum adhesion to Textroflash and other H&B approved membranes on all vertical and horizontal surfaces.

- Can be used as a protective coating for a variety of priming applications where a clear UV-resistant surface is needed.

**Limitations:**

DO NOT ALLOW material to freeze

**Properties:**

Description - liquid  
Color- white, dries clear  
Solids Content- 48-50%  
Viscosity (cps @ 250 C) - <3000  
pH - 8.0-9.0  
Odor- slight

**Composition:**

Acrylic Resin  
Water

**Application:**

- Surface must be free of all foreign matter
- Primer can be applied by brush, squeegee, or spray equipment and should yield a coverage of approximately 75 square feet per gallon depending on porosity of the substrate.

**Packaging:**

5 gallon pail
